

Ginkgo biloba FASTIGIATA

BLAGON ('Blagon')

Výška	15 - 20 m
Šírka	2-3m
Koruna	columnar, light, open crown
Kôra a vetvy	twigs light brown, bark grey-brown, later deeply grooved
Listy	fan-shaped, in clusters of 3 - 5, up to 10 cm long and wide, green
Jesenné sfarbenie	Žltá
Kvety	green, inconspicuous, April/May
Plody	fruitless cultivar
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	fairly to good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, priemyselné oblasti
Tvar	Vysokokmeň, Vetvený, Vyvetvený ihličnan, Vzorový ihličnan
Pôvod	Derly Obtentions, Authevernes, France, 1999

Large columnar tree, 15 to 20 m tall with steeply rising main branches. Twigs are light brown and smooth, mature bark is grey-brown and deeply grooved when older. The typical fan-shaped leaves are the trademark of Ginkgo, 'Blagon' is no exception. They are up to 10 cm long and wide. In autumn the leaves turn intense golden yellow. This French selection has a columnar growth habit that is more or less the same as 'Princeton Sentry'. The cultivar name refers to the village of the same name near Bordeaux where the tree was found. For commercial reasons and because the nomenclature rules do not allow the inclusion of a Latin word (fastigiata) in the cultivar name, the trade name Fastigiata Blagon was chosen to show that this is a columnar tree. The strong rising branching pattern makes this tree very suitable for narrower streets.
