

Pinus parviflora 'Glaucua'

Výška	6 - 12 m
Šírka	6-10m
Koruna	broad pyramidal, half-open crown, capricious growing
Kôra a vetvy	smooth, grey, later flaking, greenish brown twigs
Listy	needles, 5 together, twisted, greyish blue, 2 - 6 cm, evergreen
Kvety	unremarkable, fragrant flowers
Plody	hanging cones, 5 - 10 cm, appearing even at a young age
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, well-permeable, tolerates very moist soil
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Vetvený, Viackmeň, Vyvetvený ihličnan, Vzorový ihličnan
Pôvod	Germany, 1909

Slow-growing tree that remains narrow when young but later grows asymmetrical and broad. The crown is semi-closed and more irregular than the species, and the lower branches, which are often shorter, hang down slightly. The trunk is purplish grey and smooth, but darker and peeling later. Twigs are bare, sometimes with fine hairs and greenish brown. The very twisted needles grow in bundles of 5 grouped primarily at the end of the twigs. This produces brush-like tops. The needles have a more striking blue colour than the species. Even young specimens already have hanging cones. Sometimes they grow singly, sometimes in groups. Tolerates sea wind, is suitable for planting in industrial areas, and requires a sunny site. Thanks to the decorate shape of the bluish grey needles, 'Glaucua' is often grown in private gardens.
