

Pinus sylvestris 'Glaucia'

Výška	12 m
Šírka	5-8m
Koruna	round, dark, dense crown, capricious growing
Kôra a vetvy	twigs orange-brown, bark grey-brown, peeling in rough strips
Listy	stiff needles, slightly twisted, in twos, 4 - 6 cm, intense grey-blue, evergreen
Kvety	? in clusters by the young shoots, light lemon-yellow, fragrant flowers
Plody	pendent cones, 1 - 5 together, 3 - 7 cm long, 2 - 3 cm wide
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well-drained, quite dry soils, lightly acidic
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	2 (-45,5 do -40,1 °C)
Odolnosť voči vetru	good, also tolerates sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň, Vyvetvený ihličnan, Vzorový ihličnan
Pôvod	Germany, circa 1990

Spherical tree which may grow rather slowly when young but can eventually reach around 12 m. The twigs are strikingly orange-brown. The mature bark is grey-brown and peels off in rough strips. The stiff, rather short needles have a slight twist and are 4 to 6 cm long. They are in twos and intense grey-blue. The grey-brown cones hang alone or in clusters of 2 to 5. This Pinus even grows in extreme conditions although it prefers well-drained, lightly acidic, quite dry soils. Very resistant to (sea) wind and not sensitive to air pollution. The cultivar name, 'Glaucia' was given to it after 1 January 1959 and is not valid according to the nomenclature rules. This takes nothing away from the fact that it is a fine tree.
