

## Taxus ×media 'Hillii'

<b>Výška</b>	2-3 m
<b>Šírka</b>	2-4m
<b>Koruna</b>	ovoid / egg-shaped, dark, dense crown
<b>Kôra a vetvy</b>	reddisch brown
<b>Listy</b>	green, evergreen
<b>Kvety</b>	unremarkable
<b>Plody</b>	fruitless cultivar
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	clay soil, loamy soil, sandy soil, acid soil, calcareous soil
<b>Spevnené plochy</b>	Netoleruje spevnené plochy
<b>Zóna odolnosti</b>	5b (-26,0 do -23,4 °C)
<b>Odolnosť voči vetru</b>	good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Použitie</b>	stromy do nádob, strešné záhrady, priemyselné oblasti, dvory
<b>Tvar</b>	Vzorový ihličnan, Ihličnan na živý plot

Taxus ×media 'Hillii' is a strong large shrub to small tree with dense branching, giving it a compact, full-bodied appearance. At a young age, this cultivar grows broadly upright, but later clearly wider and rounder in shape. Because of its wider shape and dense branching, 'Hillii' is particularly suitable for wide (block) hedges and topiary. 'Hillii' resembles 'Hicksii' in name, but as a plant more like 'Greenland' and 'Overeynderi'. Not least because 'Hillii' is male and 'Hicksii' is female. The poisonous seeds are therefore not formed, although the foliage is also poisonous. However, 'Hillii' does flower profusely, visible by the small yellow buds and clouds of pollen when the plant moves. There are female plants in circulation under the name 'Hillii', but these are not true to type. It is an old cultivar, but still one of the most widely used. Tolerates, like other Taxus, heavy pruning well.
