

Acer ×freemanii SIENNA GLEN ('Sienna')

Výška	15 m
Koruna	pyramidal to broad pyramidal, dark, dense crown
Kôra a vetvy	smooth, grey-brown
Listy	3 to 5 lobes, shiny, bright green with light red stem, 8-10 cm
Jesenné sfarbenie	Oranžová, Červená
Kvety	reddish flower corymbs, female flowers, March/April
Plody	single seeds, winged, always in pairs, few or entirely absent, fruitless cultivar
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any, but not too limy
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	Bradley K. Hanson, Mahtomedi, MN, USA, circa 1990
Synonymum	<i>Acer rubrum</i> 'Sienna Glen'

Strongly growing, medium-size tree up to approx. 15 m height with regular pyramidal and later broad pyramidal crown. The leaves sprout green and stay shiny green in colour throughout the summer. The leaf stems are light red on top. The leaf is relatively small for an *A. × freemanii* cultivar. In autumn the leaf turns vivid orange-red to deep scarlet. The autumn colour persists quite a long time before the leaf falls. Although the plant is female, fruits rarely form. Less suitable for use in narrower streets due to its strong growth and fairly broad crown, but the tree is a good adornment for avenues, wide streets and parks. Like all *A. x freemanii*, this flourishes on most soils as long as they are not too limy.
