

Acer campestre 'Anny's Globe'

Výška	3-5 m
Šírka	2-3m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	grey
Listy	green
Jesenné sfarbenie	Žltá
Kvety	yellowgreen, flowers in May
Plody	redgreen, inconspicuous
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good/very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli, Cenné pre motýle
Použitie	úzke ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň

Acer campestre 'Anny's Globe' is a bulbous growing cultivar, usually grafted on a tall stem. The tree grows slowly and will develop a densely branched, compact, almost spherical crown. Eventually, 'Anny's Globe' reaches a height of 3 - 5 m. Depending on the graft height, the final height may vary slightly. Has the same characteristics as the species (see A. campestre), but 'Anny's Globe' is smaller in all parts and hardly suffers from mildew or spider mites. In autumn, the leaves turn golden yellow before falling off. Because of its small crown size, this cultivar is extremely suitable for use in tree boxes, roof gardens, (small) gardens, parks and small-scale green projects. The fact that this tree tolerates dry soil and semi-paved areas and can stand in full sun increases its application possibilities. 'Anny's Globe' was selected as a seedling of 'Eco Sentry' by André van Nijnatten from Zundert in 1993. Hardiness zone: 5
