

Acer campestre 'Baronne'

Výška	6 - 12 m
Šírka	3-6m
Koruna	columnar, dark, dense crown
Kôra a vetvy	smooth, light grey-brown
Listy	3/5 lobes, shiny dark green, 8 - 12 cm
Jesenné sfarbenie	Žltá
Kvety	small, terminal corymbs, yellow-green, May
Plody	single seeds, winged, always in pairs
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	any soil, except dry, infertile, sandy soil
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good/very good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Odolné posypovej soli, Cenné pre motýle
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	Pépinières Gérard Larsy & Fils, Lesdain, Belgium, 2000

Discovered by Eric Larsy in 2000 among a batch of seedlings in his nursery. The tree was notable for the absence of mildew. This columnar, small to medium size tree also grows more strongly than comparable cultivars. The leaves are bigger than with other cultivars, and dark green. The tree is free from red spider mites and mildew. Perfect avenue tree for narrow streets, housing estates, squares and green borders. Does not grow well enclosed by paved surfaces. Light corrective pruning may be necessary for the first four or five years after planting out to attain a good crown shape. The field where the tree was selected is called 'Le Baron', hence the cultivar name.
