

Acer cappadocicum 'Aureum'

Výška	10 - 15 m
Šírka	6-9m
Koruna	wide, egg-shaped, half-open crown
Kôra a vetvy	young twigs purple-brown, later greyish brown
Listy	from deep purple through bright yellow to yellow-green, 8 - 14 cm
Jesenné sfarbenie	Žltá
Kvety	yellow green corymbs, 6 - 7 cm, May
Plody	single-seeded, winged, light green
Térne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	humic, moist soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate to good
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Hesse Baumschulen, Weener, Germany, 1914

With regard to the growth habit this cultivar strongly resembles the species, but the main difference is the colour of the leaf. When unfolding the leaf is deep purple, afterwards it turns quickly into bright yellow. During summer the leaf turns light green and in autumn it turns back to yellow again. Unfortunately the juvenile foliage is slightly sensitive to scorching in sunny periods in spring and early summer. The tree is not tolerant to very dry soil, nor a soil with a high pH. In a lightly shady site 'Aureum' can grow into a spectacular avenue tree in wide streets or as a solitary in parks.
