

Acer cappadocicum subsp. lobelii

Výška	12 - 18 (20) m
Šírka	3-5m
Koruna	columnar, later vase shaped, half-open crown
Kôra a vetvy	of the species, young twigs blue pruinose
Listy	5 lobes, 8 - 14 cm, dark green
Jesenné sfarbenie	Žltá
Kvety	yellow-green corymbs, 5 - 6 cm, April/May
Plody	flat oval fruits
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	humic, tolerates hard surfaces
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	South Italy
Synonymum	Acer lobelii

Medium-sized tree with a conspicuously slender, columnar shaped crown, turning into a more vase-like shape when maturing. The young twigs are distinctively covered by a bluish white wax coating, a characteristic feature of this cultivar. The shiny, dark green leaves have five forward pointing lobes. In autumn the leaf turns yellow. 'Lobel' is a cultivar that is not tolerant to a high pH like the other cultivars of the A. cappadocicum. 'Lobel' is, however, wind resistant and can perfectly be used in hard surfaces. This excellent cultivar is extremely suitable for narrow streets, but 'Lobel' is also very characteristic as a park tree.
