

Acer davidii

Výška	8 - 12 (15) m
Šírka	7-11m
Koruna	oval to round, light, open crown, capricious growing
Kôra a vetvy	twigs purple with greyish white longitudinal stripes
Listy	oval to elongated, dark green, 8 - 16 cm
Jesenné sfarbenie	Žltá, Oranžová, Červená
Kvety	pendent corymb-shaped racemes, light yellow, May
Plody	single-seeded, single-winged, light green
Térne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all soils
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Central China

Because of its conspicuously striped bark *A. davidii*, together with *A. capillipes* and *A. rufrinerve*, belong to the so-called “Snake Bark maples”. The young twigs are dark purple- red and retain this colour during winter. The older twigs and stem have conspicuously greyish white longitudinal stripes. The leaves are less prominently lobed and unlike *A. capillipes* the leaves of *A. davidii* are hairy on the under surface along the veins. The leaf of young plants is ternate, those of older trees do not have lobes. The flowers are unisexual, male and female flowers appear on one plant. The plant has a strongly branched and compact root system. The application of the plant is restricted to parks and larger gardens because it is less suitable for use in hard surfaces. This decorative tree will also stand out well in green borders.
