

Acer davidii subsp. grosseri

Výška	circa 10 m
Šírka	6-8m
Koruna	oval to round, light, open crown, capricious growing
Kôra a vetvy	twigs purple with grey-white longitudinal stripes
Listy	usually 3-lobed, oval triangular, circa 9 cm
Jesenné sfarbenie	Oranžová, Červená
Kvety	pendent racemes, light yellow, May
Plody	single-seeded, single-winged, light green
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all soils
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	Northern and Central China
Synonymum	Acer grosseri

This Snake Bark maple forms a large multi-stemmed shrub to a small tree to a maximum height of circa 10 m. The crown is oval to round with decorative overhanging branches. The twigs usually have a slightly more greenish hue and are a little lighter than those of *A. davidii*. Therefore the stripes are less prominent. The usually 3-lobed leaves may sometimes be almost without lobes. The margin of the leaf is doubly serrated. The flowers are monoecious; female and male flowers grow on one plant. The plant has a strongly branched and compact root system. As is to be expected from a subspecies this one differs little from the species *A. davidii*. *A. davidii* subspecies *grosseri* is an ornamental plant which can be applied well in gardens and narrow streets.
