

Acer negundo 'Auratum'

Výška	5 - 7 m
Šírka	4-6m
Koruna	wide, egg-shaped, half-open crown
Kôra a vetvy	young twigs shiny green and pruinose
Listy	unevenly feathered, golden yellow, up to 20 cm, feathered leaf
Kvety	female, pendent in thick clusters, April
Plody	falcate, winged, in racemes
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements, calcareous tolerant
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	moderate to poor
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň
Pôvod	Späth Baumschulen, Berlin, Germany, 1891
Synonymum	Acer negundo odessanum HORT.

Small tree or large shrub. The most striking difference with the species being the leaves. These are beautifully golden yellow and as a rule have red leaf stalks, which gives a nice contrasting effect. 'Auratum' is an old female cultivar found and named in 1891 by Späth (Berlin). It is still an attractive tree, especially for application in parks, on squares and in gardens. The tree grows both on wet and dry sites. It has a deep rooting main root which branches out strongly. Sometimes this plant is known by its cultivar name of 'Odessanum'. The real A. negundo 'Odessanum' strongly resembles 'Auratum', but should have a more regular shaped crown. Plants that are sold under the name 'Odessanum', are always A. negundo 'Auratum'.
