

Acer palmatum 'Osakazuki'

Výška	4 - 8 m
Šírka	4-8m
Koruna	round, half-open crown, capricious growing
Kôra a vetvy	brown to grey-brown, smooth
Listy	palmately lobed, deeply cut, green, 6 - 10 cm
Jesenné sfarbenie	Oranžová, Červená
Kvety	pendent stalked panicles, purple-red, April/May
Plody	winged nutlet (samara)
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well permeating humic sandy soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6 (-23,3 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	Japan, 1882

One of the more familiar and better cultivars of the large and shape-abundant group of Japanese maples. At first a solid shrub, when maturing growing into a small, multi-stemmed tree. Eventually it will become as wide as it is high. Slow growing. The leaf is palmately lobed and has seven, long pointed lobes. In spring it unfurls with an olive-brown colour, in summer it is dark green. In summer juvenile foliage is a striking orange. In autumn all the leaves get spectacular red and orange hues. 'Osakazuki' is one of the best cultivars with regard to autumn colours. The winged nutlets (samaras) are red too. A partially shaded site is best, but a sunny location will also be tolerated. The plant can be applied in gardens, parks and as a solitary.
