

Acer platanoides CONQUEST ('Conzam')

Výška	10 - 12 m
Šírka	6-8m
Koruna	ovoid, dark, dense crown
Kôra a vetvy	bark dark grey, branches light brown
Listy	5/7 lobes, dark red to purplish green
Jesenné sfarbenie	Oranžová, Červená
Kvety	yellow-green, in corymbs, before the leaf development
Plody	winged nutlets (samara), 3.5 - 4.5 cm long
Térne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	any soil, except peat
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	not very sensitive, not resistant to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	bulváre a široké ulice, úzke ulice, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	Lake County Nursery, Perry, OH, USA, 2009
Synonymum	Acer platanoides 'Conquest'

Grows in nearly columnar pattern when young, later becoming somewhat broader, eventually developing an ovoid crown. Originated as mutant of 'Crimson King' and has the same shiny, dark red leaf. This is especially noticeable in spring. Later in summer, the leaf turns purplish green to dark green; the young shoots still present provide an attractive colour combination. In autumn, the leaf turns orange-red. The cultivar somewhat resembles 'Crimson Sentry', but has a stronger root system. Highly suitable for narrower avenues and streets, and on squares. Grows on any soil, but does not tolerate stagnating groundwater and peaty soils.
