

Acer platanoides 'Crimson King'

Výška	10 - 15 m
Šírka	8-12m
Koruna	wide conical to oval, dark, dense crown
Kôra a vetvy	twigs light brown, bark smooth, dark grey
Listy	5-lobed, shiny dark reddish purple, about 20 cm
Kvety	yellow-green, in corymbs, April, before the leaf development
Plody	winged nutlets (samara), 3.5 - 4.5 cm long
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	any soil, except peat
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good; cannot tolerate sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň
Pôvod	Barbier & Co., Orléans, France, 1937

A medium-sized tree to 15 m tall. The crown is wide conical to oval. In maturity strongly akin to 'Crimson Sentry', but especially when juvenile it has a wider crown. 'Crimson King' also grows much more vigorously. The leaf is shiny dark red. Flowers and fruit are typical of the species. Was selected in Belgium in 1937 by the French company Barbier & Co., but only introduced in 1947 by Gulfstream Nursery, USA. Used as park tree and solitary. The cultivar grows in any soil, but does not tolerate stagnant groundwater and peaty soils. Good wind tolerance.
