

Acer platanoides 'Globosum'

Výška	5 - 7 m
Šírka	5-7m
Koruna	round, later flattened , dark, dense crown
Kôra a vetvy	bark dark grey, branches light brown
Listy	5/7-lobed, green, circa 18 cm, in autumn golden yellow
Jesenné sfarbenie	Žltá
Kvety	yellow-green, in corymbs, April, before leaf sprouts
Plody	winged nutlets (samara), 3.5 - 4.5 cm
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	any soil, except peat
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	not very sensitive, not resistant to sea wind
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	Van Houtte, Belgium, 1873

A much used tree with a dense, closed crown. Is grafted on a stem of A. platanoides, usually at 2.2. m high. In the first years the crown is round-headed, when maturing it spreads out, thus assuming a flattened spherical shape. The crown becomes circa 6 m across. When unfurling the leaf has a slightly brown-red hue, later it turns into dark green. In autumn it is intense yellow. The inflorescence is of the species. This tree is less suited for narrow avenues and streets due to its wide crown. 'Globosum' can be applied splendidly on squares and in shopping areas. The cultivar demands little from the soil and is not wind sensitive. Is tolerant to drought.
