

Acer rufinerve

Výška	9 - 12 m
Šírka	5-6m
Koruna	wide vase-like shaped, light, open crown, capricious growing
Kôra a vetvy	green with white-grey stripes
Listy	palmate, dark green, 5 - 15 cm
Jesenné sfarbenie	Žltá, Červená
Kvety	yellow-green, in corymbs, April/May
Plody	winged nutlets
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	lightly acid, permeating but not dry
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné)
Použitie	stromy do nádob, malé záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Japan

A large shrub that may grow into a multi-stemmed tree. The loose habit generates an open, vase-like shaped crown. The tree can reach 10 m tall. In its original habitat in Japan it can even reach 12 m. When the tree is bare, the olive-green twigs are visible and show striking, white-grey longitudinal stripes. The green, 3-lobed, leaf varies in size from 7 to 15 cm. Across it is circa 10 cm. In autumn it turns from flaming orange-red to scarlet-red. This is a very important decorative feature. The tree forms a shallow root system which branches out profusely. A much applied maple from the group of striated maples. Though the plant prefers a warm position, scorching may occur in hot summers.
