

Acer saccharum BELLE TOWER ('Reba')

Výška	10 - 15 m
Šírka	6-10m
Koruna	narrow ovoid, dark, dense crown
Kôra a vetvy	grey bark, greenish brown branches
Listy	3/5 lobes, fresh green, 8 - 15 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	greenish yellow, inconspicuous, march
Plody	winged nutlets, 4 - 5 cm long
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	hardly any soil requirements, not too moist
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	moderate to poor
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1-6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	J. Frank Schmidt & Son Co., Boring, OR, USA

Medium-size tree, initially with an almost columnar crown, quickly becoming a narrow ovoid. The palmately lobed leaves have 3 to 5 lobes. They are a fresh green and turn orange-yellow in autumn. The tree was originally discovered in southern Tennessee and retains fresh green leaves even in warmer zones, unlike other cultivars of *A. saccharum*. 'Reba' is one of the narrowest cultivars of *A. saccharum*. Though the sugar maple thrives in many soils, a soil that is too wet is unsuitable for healthy growth. The tree cannot tolerate stagnant water and is sensitive to road salt. Poor tolerance to paved surfaces.
