

Aesculus ×carnea

Výška	15 - 20 m
Šírka	10-15m
Koruna	globular, dark, dense crown
Kôra a vetvy	grey-green, with light vertical grooves, non-sticky buds
Listy	usually five leaflets, dark green, circa 15 cm
Kvety	pink to red, in erect panicles, May
Plody	few, less prickly than A. hippocastanum, Ø 4 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, preferably not too dry
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň, Viackmeň
Pôvod	Germany, ca 1818
Synonymum	Aesculus rubicunda

A crossing between A. hippocastanum and A. pavia. Grows slower and remains smaller than A. hippocastanum. The dense crown casts a deep shade. A mature tree can reach a height of up to 20 m and a width of 15 m. The slightly shiny, opposite leaves are more or less folded and can grow to 15 cm across. They appear early in spring and remain for a long time. The autumn colour is yellow brown. Not until a tree is 8 to 10 years old, do the conspicuously coloured flowers appear. These appear as long erect, panicles of 15 - 20 cm and are pink red. The fibrous root system consists of a main root which branches out well and goes deep into the ground. The soil must not be too dry. Intolerant to asphalt and/or hard surfaces unless the base area is large enough.
