

Aesculus xcarnea 'Plantierensis'

Výška	12 - 15 m
Šírka	8-12m
Koruna	spherical, dark, dense crown
Kôra a vetvy	grey-green, with light vertical grooves, non-sticky buds
Listy	7 leaflets, shiny green, 15 - 22 cm
Kvety	pale yellow to flesh-coloured pink, erect panicles, May
Plody	none, fruitless cultivar
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, preferably not too dry
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	Simon-Louis Frères, Metz, France, 1894
Synonymum	Aesculus xplantierensis

A hybrid between *A. hippocastanum* and *A. x carnea*. Eventually growing into a large tree with a heavy crown that throws a dark shade. The 7-lobed leaf consists of stalkless leaflets that are dark green on top and lighter underneath. Characteristic is the light hair growth along the veins and the underside of the leaf. The flower panicles are large; they have the same size as those of the *A. hippocastanum*. The colour of the flower is pale yellow when it appears and turns to a flesh-coloured pink. The tree bears no fruits, which makes it very suitable for squares and streets. The root system is formed by a main root which branches out well and goes deep into the ground. The soil must not be too dry. Intolerant to asphalt surfaces, unless the base area is large enough.
