

## Aesculus 'Digitata'

<b>Výška</b>	6 - 8 m , slow growing
<b>Šírka</b>	4-6m
<b>Koruna</b>	wide conical with pendulous branches , dark, dense crown
<b>Kôra a vetvy</b>	brown, thin smooth bark
<b>Listy</b>	palmatifid, 3/5 leaflets, linear dissected, dark green, 10 - 15 cm
<b>Kvety</b>	white, in erect panicles, May/June
<b>Plody</b>	no spines
<b>Tríne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	all
<b>Spevnené plochy</b>	Toleruje čiastočné spevnenie
<b>Zóna odolnosti</b>	6a (-23,3 do -20,6 °C)
<b>Odolnosť voči vetru</b>	very good
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1–6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre včely (medonosné)
<b>Použitie</b>	malé záhrady
<b>Tvar</b>	Vysokokmeň
<b>Pôvod</b>	probably France, before 1864
<b>Synonymum</b>	Aesculus hippocastanum 'Digitata'

A hybrid between *A. hippocastanum* and an unknown species. 'Digitata' is a nice, small tree that grows slowly. The leaflets of the palmatifid leaf are short and narrow and have winged leaf stalks. There are often reduced to three and are deeply linearly dissected. The leaf margin is sharply serrated. The flowers are similar to those of *A. hippocastanum*, but the petals are not curved, as is the case with *A. hippocastanum*. The fruits don't appear very often. They have no spines and drop early. The tree is susceptible to deicing-salt (for icy roads).
