

Aesculus hippocastanum

'Baumannii'

Výška	20 - 25 m , fast growing
Šírka	14-18m
Koruna	spherical , dark, dense crown
Kôra a vetvy	thin, brown and smooth bark, sticky buds
Listy	palmately, 5/7 leaflets, dark green, 15 - 20 cm
Kvety	double, white with a tinge of red, in panicles, May/June
Plody	none, sterile variety , fruitless cultivar
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements, tolerates hard surfaces, but no asphalt
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Pôvod	A. N. Baumann, Bollwiller, France, 1822
Synonymum	Aesculus hippocastanum var. plena

A known, double-flowered cultivar with a nicely shaped, spreading and dense crown and a short and sturdy trunk. Very dense casting a dark shade. Does not grow as big as the species. Height up to 25 m, spread up to 15 m. Main branches almost grow horizontally and have pendulous twigs with upright tips. The opposite leaves can become 20 cm across. In autumn they turn to yellow brown. The double-flowered, sterile inflorescence is large and profuse. The tree shows white, shorter and more compact panicles than A. hippocastanum. Inflorescence is longer than of the species. 'Baumannii' is a sterile variety without fruits. This makes the tree very suitable for use in streets and avenues. The tree requires pruning for vehicular or pedestrian clearance due to its horizontal branching. Has a deep going main root. Susceptible to deicing-salt (for icy roads).
