

Aesculus indica

Výška	18 - 20 m
Šírka	12-14m
Koruna	ovate to round, dark, dense crown
Kôra a vetvy	grey-green trunk, green-brown twigs
Listy	palmate, 7/9 leaflets, dark green, 15 - 30 cm
Kvety	panicles, white with red or yellow spot, June/July
Plody	ovate, non-prickly, Ø 3 - 3.5 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	preferably moist retaining
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	8a (-12,2 do -9,5 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru
Stromy pre zvieratá a hmyz	Odolné vetru, Cenné pre včely (medonosné)
Použitie	bulváre a široké ulice, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	north west Himalayas, 1851

Aesculus indica is a big tree with an ovate to round crown which branches out diagonally upwards. The trunk is smooth and grey green. Twigs are green brown coloured. The palmately-compound, palmatifid leaf has 7 to 9 leaflets. Each one is 15 - 30 cm long and has a fine toothed margin. The topside is mat dark green, the underside is blue green. The circa 25 cm large, terminal panicles have white flowers which are yellow or red spotted. After flowering, non-prickly, ovoid fruits with brown red seeds appear. Referring to leaf and flower, it is one of the nicest chestnuts. Unfortunately less hardy than A. hippocastanum. This tree can be used in parks and avenues. It is also suitable for industrial estates. Aesculus indica prefers moist retaining soil. The tree is not sensitive to leaf spot. Very healthy tree, should be used more often.
