

Aesculus parviflora

Výška	3 - 5 m
Šírka	6-10m
Koruna	flat-topped spherical, very broad, dark, dense crown
Kôra a vetvy	grey-brown, buds non-sticky
Listy	5/7 fingers, green, 8 - 20 cm
Jesenné sfarbenie	Žltá
Kvety	white, in long erect panicles, 20 - 40 cm, July/August
Plody	smooth, obovoid, 3 - 4 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few soil requirements, can tolerate paved surfaces
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	malé záhrady
Pôvod	South-eastern USA

Shrub-like plant that 'only' grows to 3 - 5 m high, but can attain up to 10 m breadth by suckering. The dark green leaves have 5 to 7 fingers and turn deep yellow in autumn. The flowering pattern is very attractive. The long flower panicles are usually 20 to 40 cm long and consist of numerous white flowers. The flowers have narrow crown petals and the stamens extend far outside the flowers. This gives the blossom a beautiful, delicate texture. The blossoming comes in July/August and is the latest in the season of all Aesculus species. The fruits are smooth and the seeds germinate very rapidly. Due to the more or less shrub-like, very broad habit, the plant is mainly suitable for use in large gardens and parks.
