

Aesculus pavia 'Atrosanguinea'

Výška	circa 15 m
Šírka	8-10m
Koruna	round, closed, dark, dense crown
Kôra a vetvy	brown, twigs sometimes with short hairs
Listy	5/7 leaflets, unfolds reddish, later light green, 10 - 15 cm
Jesenné sfarbenie	Žltá, Oranžová
Kvety	panicles, dark red, June
Plody	smooth, light brown, irregular fruiting
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	bad
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre včely (medonosné)
Tvar	Vysokokmeň, Viackmeň
Pôvod	south eastern North America

Although this cultivar grows fairly slowly, it reaches considerably higher than the species. Eventually it attains a height of 15 m. The spreading round crown is dense. The thick twigs have non-sticky buds. The leaves unfold with a reddish colour and turn to light green. They are opposite and become up to 15 cm across. They are palmately compound and consist of 5 to 7 smaller, obovate leaflets. 'Atrosanguinea' has a yellow brown to orange autumn colour and the leaves are shed early. The rather small, dark red flowers appear in erect panicles and become 10 to 15 cm. The tree prospers best in slightly moist soil. Good hardiness. Intolerant to hard surfaces and is susceptible to deicing-salt (for icy roads).
