

Amelanchier 'Autumn Brilliance'

Výška	3 - 7 m
Šírka	3-7m
Koruna	broad ovoid, half-open crown
Kôra a vetvy	light grey, smooth
Listy	obovate, green, 5 - 10 cm
Jesenné sfarbenie	Žltá, Červená
Kvety	white, in large, rather erect racemes, April
Plody	purplish black, 1 - 1.5 cm, edible, edible fruits
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few soil requirements, prefers calcareous
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Willet N. Wandell, Urbana, IL, USA, 1984
Synonymum	Amelanchier × grandiflora 'Autumn Brilliance'

Broadly rising large shrub to small tree. The leaves have a somewhat purple hue on emerging and are slightly hairy on the underside, rapidly becoming hairless afterwards. The fresh green summer leaf turns yellow to deep red in autumn. This can vary depending on location and (micro)climate. The relatively large flowers are grouped in large, rather erect racemes. They are pure white and open in April. The flowers can be followed by purplish black fruit. The edible fruits are sweet and juicy. The plant originated as a spontaneous seedling. Amelanchier has few soil requirements but grows best in calcareous soil.
