

Betula ermanii 'Blush'

Výška	10 - 15 m
Šírka	6-10m
Koruna	wide pyramidal, half-open crown
Kôra a vetvy	white bark with red hue
Listy	narrow ovoid with acute top, dark green, 9 - 11 cm
Jesenné sfarbenie	Žltá
Kvety	catkins, yellow green, ? single and erect, ? 4 - 6 cm, April
Plody	ovoid fruiting catkins, 2 - 3 cm long
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few requirements, tolerates rather moist soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Cenné pre motýle
Použitie	stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Viackmeň
Pôvod	Dutch selection
Synonymum	Betula costata HORT

Wide shrub to average-sized tree with a wide pyramidal crown. Because of its width and the fairly low starting branching, it is a tree that requires space. Often mistaken for *B. costata* due to its large resemblance, but is however, a variety of *B. ermanii*. The white bark often has a red hue, which explains the cultivar name of 'Blush'. Because of this very nice colour of the stem it is a beautiful park tree, which is worthwhile planting, both as a solitary and in groups. The leaf is strong and has a double-toothed margin. It is bigger than of the *B. ermanii* 'Holland', the autumn colour is strikingly yellow. The tree is shallow rooting with a delicate root system and many fibrous rootlets. Susceptible to (sea) wind.
