

Betula utilis var. jacquemontii

Výška	10 - 15 m
Šírka	6-8m
Koruna	oval to round , half-open crown
Kôra a vetvy	creamy white, flaking
Listy	oval to ovoid, dark green, 10 - 12 cm
Jesenné sfarbenie	Žltá
Kvety	catkins yellow green, ? ± 2 cm, ? 10 - 12 cm, April
Plody	fruiting catkins, 2.5 - 3.5 cm, pendulous, stalked
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	all, loose soil, requires little moisture
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	Himalayas
Synonymum	Betula jacquemontii SPACH

Average-sized tree with a nice, regular crown, a clear difference with the irregularly growing B. utilis. Originally growing in the Himalayas and parts of North West India. This low branching tree also appears as a multiple-stemmed birch with a strikingly white, flaking bark. Under the plates the bark is darker. In winter this tree is really eye-catching. Young twigs are hairy and have a warm, red brown colour. They have many lenticels. The leaf is shiny and coarsely toothed. The autumn colouring is golden yellow. This bark has a rich inflorescence of 12 cm long catkins. The tree is shallow rooting with, especially in the top soil, many fibrous rootlets.
