

Carpinus turczaninowii

Výška	6 - 8 (15) m
Šírka	6-8m
Koruna	round, dark, dense crown, capricious growing
Kôra a vetvy	Young twigs olive green, older branches and bark dark grey and smooth
Listy	broad ovate to ovate-lanceolate, 2 - 6 cm, dark green
Kvety	monoecious, April
Plody	in separate fruiting catkins, 3 - 6 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	few soil requirements, preference for loamy ground
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	7 (-17,7 do -12,3 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru
Použitie	stromy do nádob, strešné záhrady, malé záhrady
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	Japan, Korea, northern China

Attractive, small to medium size tree with gracefully overhanging branches that form a rounded crown. The first year twigs are olive green, the older bark dark grey. The leaves are deeply veined, dark green on top and conspicuously lighter green on the underside. No remarkable autumn colours. The flower catkins are inconspicuous, but the light green fruiting catkins consist of relatively large bracts. In general, many fruiting catkins are formed. Root growth is relatively close to the surface. Has few soil requirements but flourishes best in loamy soils. The rotted leaves are good soil improvers.
