

Castanea sativa 'Albomarginata'

Výška	20-25 m
Šírka	15-20m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	grey
Listy	variegated, off white/ green
Kvety	cream-white, flowers in June, fragrant flowers
Plody	edible fruits, brown
Trne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Tvar	Vysokokmeň

A large tree, approx. 25 m tall, with an irregular crown up to 20 m wide. The heavy, squat, dark grey trunk twists on its axis taking the deep grooves in the bark with it. Young branches are olive-green but quickly turn reddish-brown. The elongated leaf is glossy and has a remarkable and regular cream-coloured to white leaf edge that is clearly serrated. Young leaves carry velvety hairs on the underside. The flowers are the same as those of the species. The spikes on the fruit husks are sometimes also partially white. The fruit is edible. 'Albomarginata' puts down a deep and widespread root system. Winter hardiness zone: 6a
