

Castanea sativa 'Pyramidalis'

Výška	25-30 m
Šírka	6-10m
Koruna	round, dark, dense crown
Kôra a vetvy	brown, grey
Listy	green
Kvety	cream-white, flowers in June, July, fragrant flowers
Plody	edible fruits, brown
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	clay soil, loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6a (-23,3 do -20,6 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Tvar	Vysokokmeň

Castanea sativa 'Pyramidalis'. A tree up to 30 m tall that is clearly distinguished from the species by its persistently narrower crown. The crown is pyramidal to conical. The heavy, squat, dark grey trunk twists on its axis taking the deep grooves in the bark with it. Young branches are olive-green but quickly turn reddish-brown. The elongated leaf is dark green and glossy and has a serrated edge. The flowers and fruit are the same as those of the species. But the tree flowers some weeks earlier than does the species. Winter hardiness zone: 6a
