

## Celtis bungeana

<b>Výška</b>	10-12 m
<b>Šírka</b>	10-12m
<b>Koruna</b>	round/spherical, half-open crown
<b>Kôra a vetvy</b>	grey
<b>Listy</b>	green
<b>Jesenné sfarbenie</b>	Žltá
<b>Kvety</b>	green, flowers in April
<b>Plody</b>	orange
<b>Tŕne</b>	Žiadny
<b>Jedovatosť</b>	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
<b>Typ pôdy</b>	clay soil, loamy soil, sandy soil
<b>Pôdna vlhkosť</b>	Vhodné do suchých pôd
<b>Spevnené plochy</b>	Toleruje spevnenie
<b>Zóna odolnosti</b>	5 (-28,8 do -23,4 °C)
<b>Ostatná odolnosť</b>	Odolné mrazu (WH 1-6), Odolné vetru
<b>Stromy pre zvieratá a hmyz</b>	Odolné mrazu (WH 1-6), Odolné vetru, Cenné pre motýle
<b>Použitie</b>	bulváre a široké ulice, priemyselné oblasti
<b>Tvar</b>	Vysokokmeň

The medium to large *Celtis bungeana* forms a round crown. Later in life, the crown will sag more, becoming more flattened and broadly vase-shaped. The young twigs are green, the old bark is light grey and smooth. Most striking about this species are the shiny dark green leaves, which give the tree a vital appearance. The leaves have three main veins, which are most clearly visible on the underside of the leaf. The leaf margin is smooth, at most with a few small teeth near the apex. Flowering is inconspicuous, but does attract bees. The flowers are followed by small black fruits.

This *Celtis* prefers to grow on loamy soil. Tolerates drought and air pollution, making it a good future tree.
