

Cercidiphyllum japonicum

'Amazing Grace'

| | |
|----------------------------|--|
| Výška | 6 m |
| Šírka | 4-6m |
| Koruna | broad, weeping, half-open crown |
| Kôra a vetvy | grey, smooth at first, peeling in strips later |
| Listy | ovate to nearly round, 5 - 10 cm, (blue-)green |
| Jesenné sfarbenie | Žltá, Oranžová |
| Kvety | inconspicuous, reddish, April, fragrant flowers |
| Plody | inconspicuous follicle (on female trees) |
| Térne | Žiadny |
| Jedovatosť | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá |
| Typ pôdy | loose, preferably loamy, not too dry, cannot tolerate drought |
| Spevnené plochy | Toleruje čiastočné spevnenie |
| Zóna odolnosti | 5 (-28,8 do -23,4 °C) |
| Odolnosť voči vetru | moderate to good |
| Ostatná odolnosť | Odolné mrazu (WH 1-6) |
| Použitie | stromy do nádob, strešné záhrady, malé záhrady, dvory |
| Tvar | Vysokokmeň |
| Pôvod | Theodore Klein, Yew Dell Farm, Crestwood, KY, USA, before 1998 |

Small but wide tree with very pendulous branches, creating a broad, weeping shape. The tree grows to about 6 m high and at least as wide. The first-year twigs are brown; the older bark is grey, peeling in strips when mature. The almost round leaf is bronze on emerging, turning blue-green in summer. The autumn colour is a splendid orange-yellow. As typical for the species, the falling leaf has a pleasantly spicy/cinnamon scent. Was discovered by Theodore Klein but named by Bob Hill of Louisville, Kentucky. Thrives in loose, preferably loamy soil. Poor tolerance to drought. The spring leaf is sensitive to night frosts. Primarily for use as a solitary tree in a large garden or park.
