

Cercidiphyllum japonicum

'Pendulum'

Výška	6 - 8 m
Šírka	4-6m
Koruna	broad, weeping, half-open crown
Kôra a vetvy	grey, smooth at first, peeling in strips later
Listy	ovate to nearly round, 5 - 10 cm, (blue-)green
Jesenné sfarbenie	Žltá, Oranžová
Kvety	inconspicuous, reddish, April, fragrant flowers
Plody	inconspicuous follicle (on female trees)
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loose, preferably loamy, not too dry, cannot tolerate drought
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	moderate to good
Ostatná odolnosť	Odolné mrazu (WH 1-6)
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokeň
Pôvod	Japan, circa 17th century
Synonymum	Cercidiphyllum magnificum f. pendulum

Relatively fast growing, small to medium size tree with very pendulous branches, creating a broad, weeping shape. Can eventually grow 8 m tall and at least as broad. The bark is grey, peeling in strips when mature. The almost round leaf is light bronze-green on emerging, turning (blue-)green in summer. The autumn colour is brownish yellow to orange-yellow. As typical for the species, the falling leaf has a pleasantly spicy/cinnamon scent. Was already being cultivated in the 17th century at a Buddhist temple on the Japanese island of Honshu. Thrives in loose, preferably loamy soil. Poor tolerance to drought. The spring leaf is sensitive to night frosts. Primarily for use as a solitary tree in a large garden or park.
