

Cornus florida

Výška	4 - 7 m
Šírka	4-6m
Koruna	wide, round, half-open crown, capricious growing
Kôra a vetvy	grey, slightly flaking
Listy	oval to ovate, dark green, underside grey, 7 - 13 cm
Jesenné sfarbenie	Červená, Fialová
Kvety	green yellow, in small heads, 4 white bracts, May/June
Plody	red berry-like stone fruits, circa 1.5 cm
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well-drained soils
Pôdna vlhkosť	Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	malé záhrady, dvory
Tvar	Vysokokmeň, Vetvený, Viackmeň
Pôvod	eastern North America

Starting from a shrub and growing into a small tree with multiple stems and a spherical crown. When maturing the branches may hang down a little, making the crown as wide as it is high. The tree grows slowly. Twigs turn from red brown into grey. Mature trunks get grey spots due to flaking. The leaf is dark green and the underside is grey. In autumn it colours beautifully from scarlet red to violet. Each head with inconspicuous little flowers is surrounded by 4 bracts that are large and have a white to slightly pinkish-red hue. This makes the inflorescence in full bloom very decorative. The ovate fruits are circa 1.5 cm across and are red coloured. The plant is shallow rooting with a fibrous root system and requires a rich soil with a high humus content, that is not too dry.
