

Cornus kousa var. chinensis

Výška	5 - 10 m
Šírka	5-10m
Koruna	wide, vase-shaped , half-open crown, capricious growing
Kôra a vetvy	grey, later slightly flaking
Listy	oval to ovate, dark green, 8 - 12 cm
Jesenné sfarbenie	Žltá, Červená
Kvety	green yellow, in small heads, 4 white bracts, May/June
Plody	strawberry-like, compound-grown, red
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	well-drained soils
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	China

Starts as a shrub and grows into a multiple-stemmed tree. Grows more rapidly and attains more height than of the species and therefore becomes a tree sooner. The width will be circa 6 - 8 m. The leaf is dark green and slightly curved. The underside is blue green. The autumn colouring has yellow and scarlet red hues. The flowers are inconspicuous. However, each head with flowers has 4 bracts that are bright white and circa 10 cm large. At the base they overlap and they are larger than of the species. The red, strawberry-like fruits are also bigger, circa 2.5 cm. They have 5 cm long, red stalks. The plant is shallow rooting with a fibrous root system. Requires a rich soil with a high humus content. Tolerates more drought than C. florida and is to be recommended above the species C. kousa.
