

Cornus nuttallii 'Monarch'

Výška	6 - 8 m
Šírka	4-6m
Koruna	wide conical , half-open crown, capricious growing
Kôra a vetvy	red brown to grey, flaking in small plates
Listy	wide ovate to oval, green, 6 - 12 cm
Jesenné sfarbenie	Žltá, Oranžová, Červená
Kvety	green yellow in heads, inconspicuous, bracts white, May
Plody	ovoid berry-like stone-fruit, Ø 1 cm, bright red
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	humus rich content and moisture-retentive
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Odolnosť voči vetru	moderate
Stromy pre zvieratá a hmyz	Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, strešné záhrady, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň
Pôvod	A. van der Bom, Oudenbosch (NL), before 1970

This cultivar 'Monarch' has an upright habit with a good upright central leader. Therefore it is better suited as a tree, which distinguishes it from the species. Young twigs are green but turn to brown red quickly. Mature trunks too, are red brown to grey. The green leaf turns yellow to orange red in autumn. The flowers are not showy. However, each head with flowers is surrounded by 6 (sometimes 4 or 8) ovoid, pointed bracts. These turn from cream white to entirely white, sometimes with a pink hue and can become 10 cm. This makes the plant in full bloom very decorative. 'Monarch' flowers profusely. The circa 1 cm large, orange-red fruits appear in early autumn. The plant roots shallowly with a fibrous root system. Must be protected against cold east wind.
