

## Crataegus ×lavalleei 'Carrierei'

Výška	5 - 7 m
Šírka	4-6m
Koruna	round, irregular, dark, dense crown, capricious growing
Kôra a vetvy	dark grey, flakes off in platelets
Listy	obovate, dark green, 7 - 11 cm
Kvety	white, in loose umbels, May/June
Plody	pale orange, remain on the tree a long time
Tríne	Áno
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	makes few demands, cannot stand wet soils
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokeň, Viackmeň
Pôvod	France, 1867
Synonymum	Crataegus carrierei HORT

Sometimes found as a sturdy shrub, but more often grown as a small tree. At first the crown has an ascending manner of growth but finally becomes irregular, more or less rounded. Up to 5 m broad. The crown looks heavy because of its denseness and the dark leaves. The leaves are glossy dark green and feel leathery. Reddish-green leaves appear on the spring shoots. The branches bear numerous large thorns, length approx. 4 cm. The white flowers emerge from pink buds in the spring. They are followed by an abundance of dull orange drupes that remain on the tree until winter. They are approximately 2 cm in diameter. The tree has a deep spreading root system. Stands up well to dry soils and atmospheric pollution.
