

Crataegus ×lavalleei

Áno

Výška	4-6 m
Šírka	3-5m
Koruna	round/spherical, dark, dense crown, capricious growing
Kôra a vetvy	brown, grey
Listy	green
Kvety	white, flowers in May
Plody	yellow, orange
Tríne	Áno
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné vetru
Stromy pre zvieratá a hmyz	Odolné mrazu (WH 1–6), Odolné vetru, Cenné pre motýle
Použitie	bulváre a široké ulice, úzke ulice, stromy do nádob, strešné záhrady, priemyselné oblasti, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Crataegus x lavallee is a small tree up to 7 m tall. The crown is somewhat irregularly rounded and looks heavy because of its denseness and the deep green leaves. The leaves are matt glossy and feel leathery. In the spring the young leaves emerge red. They remain on the tree for a long time in the autumn. The thorns, 4 cm long, are remarkable. The white flowers appear in loose umbels in May and June. Later pale orange fruits appear and stay on the tree until winter. They are approx. 1.5 to 1.8 cm in size. Can be used in parks, streets and small gardens. Winter hardiness zone: 5a Crataegus x lavallee is at its best in the spring when the glossy dark green leaves serve as a background for the white flowers.
