Fagus sylvatica 'Laciniata' (syn. *F. s. heterophylla*) has a spreading, round crown and attains a height of 20 - 25 m. The green leaf is irregularly pinnately dissected and has a yellow to red-brown autumn colour. It is less deeply dissected than '*Asplenifolia*', but deeper dissected than '*Grandidentata*'. The tree has an inflorescence with small, inconspicuous flower catkins. These are followed by nutlets. '*Laciniata*' is a specimen tree. It prefers a well-drained soil that is not too wet and is rich in humus content. Moderately wind resistant. Winter hardiness zone: 5b
