

Fagus sylvatica 'Rohan Gold'

Výška	14-16 m
Šírka	3-5m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	grey
Listy	green, yellow, yellow
Kvety	yellowgreen, flowers in May
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, calcareous soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Tvar	Vysokokmeň

Fagus sylvatica 'Rohan Gold' grows in a compact way and has a round crown. Height circa 14 - 16 m. The leaf unfolds in bright yellow colours and turns to light green soon. This 'prevents' the tree from scorching. The leaf is oblong-ovate, moderately to deeply dissected with rounded lobes and 4 - 7 cm in size. The inconspicuous inflorescence is followed by 1- 2 cm large nutlets. This crossing between 'Rohanii' and 'Zlatia' was introduced by Arboretum Trompenburg (Rotterdam, NL) in 1973. Winter hardiness zone: 5b
