

Fagus sylvatica 'Rohanii'

Výška	12-14 m
Šírka	8-12m
Koruna	round/spherical, dark, dense crown
Kôra a vetvy	grey
Listy	reddish brown, red
Kvety	yellowgreen, flowers in May
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, calcareous soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	stromy do nádob, strešné záhrady
Tvar	Vysokokmeň, Vetvený

Fagus sylvatica 'Rohanii' is a relatively small beech with a compact round crown. Due to its slow growth it does not get taller than 12 - 14 m. The dark red-brown leaf unfolds bright red. It is oblong-ovate, irregular, moderately to deeply dissected with rounded lobes and unfolds circa one week earlier than F. sylvatica. The size of the leaf is 4 - 8 cm. Inconspicuous inflorescence followed by nutlets. Park tree or solitary. Prefers not too wet, well-drained soil, rich in humus content. Moderate wind resistance. Winter hardiness zone: 5b Fagus sylvatica 'Rohanii' is a relatively small beech. The emerging leaves are a bright red and appear a week earlier than those of the common beech.
