

Fraxinus americana var. microcarpa

| | |
|----------------------------|--|
| Výška | 10-15 m |
| Šírka | 12-15m |
| Koruna | broad ovoid, half-open crown |
| Kôra a vetvy | brown, grey |
| Listy | green, feathered leaf |
| Jesenné sfarbenie | Žltá, Oranžová, Červená |
| Kvety | yellowgreen, flowers in May |
| Tŕne | Žiadny |
| Jedovatosť | Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá |
| Typ pôdy | clay soil, loamy soil, sandy soil, calcareous soil |
| Spevnené plochy | Toleruje čiastočné spevnenie |
| Zóna odolnosti | 4 (-34,4 do -28,9 °C) |
| Odolnosť voči vetru | good |
| Ostatná odolnosť | Odolné mrazu (WH 1-6), Odolné vetru, Odolné posypovej soli |
| Použitie | bulváre a široké ulice |
| Tvar | Vysokokmeň |

Fraxinus americana var. microcarpa is a narrow-growing variety of *F. americana*, which sprouts late and is therefore less susceptible to night frost. The crown is closed and wide ovoid, height circa 15 m. Dark green, odd-pinnate leaves, usually with 5 - 7 leaflets, 30 - 40 cm big. Underneath grey white and with a violet-yellow autumn colouring. Inflorescence in May, monoecious panicles. Seeds ± 3 cm large. Useful as a park, avenue and street tree. Preferably rich, moist, open soil, can also be planted in dry loamy soil. Wind resistant. Winter hardiness zone: 4
