

Fraxinus excelsior 'Diversifolia'

Výška	15 - 20 m
Šírka	10-15m
Koruna	wide pyramidal, half-open crown
Kôra a vetvy	grey-brown bark, regularly and shallowly furrowed
Listy	simple, ovate to elliptical, dark green, circa 8 - 12 cm
Kvety	inconspicuous in lateral panicles
Plody	very few to absent
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	fertile, moist retentive
Pôdna vlhkosť	Vhodné do vlhkých pôd, Odolné voči krátkodobému zaplaveniu
Spevnené plochy	Toleruje čiastočné spevnenie
Zóna odolnosti	4 (-34,4 do -28,9 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné mrazu (WH 1-6), Odolné vetru, Odolné posypovej soli
Použitie	bulváre a široké ulice, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň
Pôvod	England, 1789
Synonymum	Fraxinus e. 'Monophylla'

This tree has an upright, pyramidal crown, that may slightly vary from tree to tree. Mature specimen attain a height of circa 15 - 20 m. The bark is grey brown and has regular, shallow furrows. Several varieties of this tree are available. NAKB selected the 'Den Bosch'. This selection can be nursed more uniformly and has a more even growth. The dark green leaf is simple and circa 8 - 12 cm long, often with 1 - 4 lateral leaflets. Younger trees may show larger leaves. The leaf is ovate to elliptical and has a striking, circa 10 cm long, stalk. Although the tree may sometimes flower, only rarely does it bear fruits. Good street and park tree. Prefers nutritive, airy soil with a high humus content and which is very moist-retentive. Withstands urban climates and hard winds well. Intolerant to closed hard surfaces.
