

Fraxinus ornus

Výška	8 - 15 m
Šírka	8-12m
Koruna	spreading oval to almost round, irregular, half-open crown
Kôra a vetvy	smooth, grey bark
Listy	odd-pinnate, 7 leaflets, mat blue green, 20 - 25 cm , feathered leaf
Kvety	terminal panicles, (cream) white, May/June, veryfragrant, fragrant flowers
Plody	winged fruit (key), 2,5 - 3,5 cm long
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	drier calcareous soils
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	7a (-17,7 do -15,0 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru, Odolné posypovej soli
Použitie	stromy do nádob, strešné záhrady, pobrežné zóny, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň
Pôvod	South Europe, West Asia

Fraxinus ornus has a spreading oval to round, irregular crown. Mature specimen can attain a height of 15 m, but usually they do not grow higher than circa 10 m. The grey bark is smooth. The odd-pinnate leaf is blue green to mat green, becomes 20 - 25 cm and consists of 7 leaflets that have a finely serrated margin. In contrast with F. excelsior F. ornus has brown to purplish, velvety grey leaf buds. Inflorescence shows white to creamy-white very fragrant flowers in conspicuous, upright and terminal panicles. These appear after the leaf in May/June. F. ornus forms winged nuts of circa 3 cm, which appear in clusters. The tree can be used as a park tree and is suitable for industrial estates. Tolerates drier, calcareous soils. Well resistant to wind.
