

Gleditsia triacanthos 'Moraine'

Výška	15-20 m
Šírka	16-18m
Koruna	oval, light, open crown
Kôra a vetvy	grey
Listy	green, feathered leaf
Jesenné sfarbenie	Žltá
Kvety	light green, flowers in June
Plody	fruitless cultivar
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, calcareous soil
Pôdna vlhkosť	Vhodné do suchých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5a (-28,8 do -26,1 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6), Odolné posypovej soli
Použitie	bulváre a široké ulice, stromy do nádob, strešné záhrady, priemyselné oblasti
Tvar	Vysokokmeň, Viackmeň

This male clone from *G. triacanthos* f. *inermis* has proven to be a good avenue tree over the years. It is a rapidly growing, nearly spineless cultivar with an irregular, spreading, oval and open crown. It attains a height of 15 - 20 m and a spread of circa 10 m, so that the tree takes up a lot of space. A disadvantage is that it is susceptible to wind due to its spreading branches. Pruning back of twigs that have grown too long is to be recommended. The grey bark has shallow fissures. The large, compound leaf unfolds late. Young twigs and young foliage are red brown. In autumn the leaf turns to golden yellow. The single leaflets are circa 3 cm. This male clone does not bear pods. Winter hardiness zone: 5a
