

Hamamelis ×intermedia 'Pallida'

Výška	4-5 m
Šírka	4-5m
Koruna	broad vase-shaped, half-open crown, capricious growing
Kôra a vetvy	brown
Listy	green
Jesenné sfarbenie	Žltá
Kvety	yellow, flowers in December, fragrant flowers
Plody	brown
Tríne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	loamy soil, sandy soil, peaty soil, acid soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	6b (-20,5 do -17,8 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	stromy do nádob, malé záhrady, dvory
Tvar	Vysokokmeň, Viackmeň

Vigorous, sturdy shrub to small tree about 3 m high and 4 m wide, with a broad, fan-shaped growth pattern and a semi-open crown. The slightly glossy mid-green leaf turns yellow in autumn. The very profuse blossoming occurs in December/January. The flowers measure about 4 cm and are an intense sulphur yellow. They have a strong, very pleasant fragrance and the plant blossoms profusely every year. The exact origin of 'Pallida' is unknown, but the plant was named in 1958 at RHS Wisley Garden, UK. 'Pallida' is the best known yellow-flowering cultivar and generally regarded as one of the best Hamamelis cultivars.
