

Ilex xaltaclerensis 'Golden King'

Výška	5-6 m
Šírka	2-3m
Koruna	broad conical, dark, dense crown
Kôra a vetvy	brown, green
Listy	variegated, green/yellow, evergreen
Kvety	white, flowers in May
Plody	reddish brown
Tríne	Žiadny
Jedovatosť	Má jedovaté časti
Typ pôdy	sandy soil, peaty soil, calcareous soil
Spevnené plochy	Netoleruje spevnené plochy
Zóna odolnosti	7b (-14,9 do -12,3 °C)
Odolnosť voči vetru	good
Ostatná odolnosť	Odolné vetru
Stromy pre zvieratá a hmyz	Odolné vetru, Plody ako potrava pre vtáctvo
Použitie	stromy do nádob, pobrežné zóny, malé záhrady, dvory
Tvar	Vysokokmeň

Small tree with densely branched, broad pyramidal crown to about 6 m. Young twigs are purple, mature bark is green-brown and smooth. Leaves are glossy dark green to grey-green, marked with broad yellow, later cream coloured margins. The margins are smooth or have a few small prickles. The flowers are small and fairly inconspicuous. Despite the name 'Golden King', they are female. They are followed by glossy, brownish red, drupes (commonly called 'berries') about 8 mm across. Prefers a humic, moist but well-drained soil and tolerates either acidic or calcareous soil. Also suitable for use as tall hedge.
