

Liquidambar styraciflua

HAPPIDAZE 'Happdell'

Výška	20 - 30 m
Šírka	8-12m
Koruna	pyramidal, later broad ovoid, dark, dense crown
Kôra a vetvy	dark grey, deeply grooved, corky fissures on branches and twigs
Listy	palmately lobed, 5 lobes, glossy green, 8 - 16 cm long
Jesenné sfarbenie	Žltá, Oranžová
Kvety	yellow-green, inconspicuous, April/May
Plody	none, fruitless cultivar
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	fertile, loamy soil
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5 (-28,8 do -23,4 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice, úzke ulice
Tvar	Vysokokeň
Synonymum	Liquidambar styraciflua 'Happdell'

Strong tree with a densely branching, initially narrow pyramidal crown and long, straight central leader. When mature, the branches project more, resulting in an ovoid crown. The grey bark is deeply grooved. Young twigs are light green and covered with conspicuous corky fissures after just a few years. The leaf has 5 lobes and is glossy green. In autumn it turns brownish purple to brownish red. The leaf stays on the tree for a long time before falling. The flowers are inconspicuous. ‘Hapdell’ bears no fruit, making it suitable for use in residential areas and along streets. Prefers fertile, moist soil; cannot tolerate persisting drought.
