

Liquidambar styraciflua 'Silver King'

Výška	20 m
Šírka	7-10m
Koruna	broad pyramidal, relatively open, half-open crown, dark, dense crown
Kôra a vetvy	Dark grey, grooved, hardly any corky fissures on branches and twigs
Listy	palmately lobed, 5 lobes, glossy grey-green with irregular creamy white margin, 7 - 14 cm long
Kvety	yellow-green, inconspicuous, April/May
Plody	round, spiky capsule on long stem, 3 - 3.5 cm long
Tŕne	Žiadny
Jedovatosť	Zvyčajne nie je jedovaté pre ľudí a väčšie zvieratá
Typ pôdy	fertile, loamy soil
Pôdna vlhkosť	Vhodné do vlhkých pôd
Spevnené plochy	Toleruje spevnenie
Zóna odolnosti	5b (-26,0 do -23,4 °C)
Odolnosť voči vetru	moderate
Ostatná odolnosť	Odolné mrazu (WH 1–6)
Použitie	bulváre a široké ulice
Tvar	Vysokokmeň
Synonymum	Liquidambar styraciflua 'Variegata'

Large tree with a broad, pyramidal, fairly open crown. The boughs stand at a fairly wide angle to the trunk. The grey bark is grooved. The young twigs are light yellow-green and have hardly any corky fissures. The leaf is glossy grey-green with irregular, creamy white margins and occasionally spots. The inconspicuous flowers are followed by spiky capsules that persist in the winter. Has no real autumn colour, but the green parts turn pinkish, producing an intriguing effect. In the past, various silver and gold coloured cultivars were grown under the name 'Variegata'. For the sake of clarity, this tree was named 'Silver King'. Unusual avenue tree for use in parks, wide streets and avenues, or on green belts. Prefers fertile, moist soil; cannot tolerate persisting drought.
